**Cllr. Duncan Enright** rep. for TC for Witney East – he is the representative who is associated with WAA. Negotiations about new plots on the Curbridge Road development are taking place (where the garden centre was) to be developed by the builder under Section 106 agreement the intention will be to hand over running to the WAA.

#### MK asked when this is likely to happen?

Any time as the signatures are going ahead —possibly starting building in 2016. Planners at District Council will be in touch.

**GB** suggested that as it is near housing then less parking space may be needed than at Lakeside, possibly a communal parking space, to give more room for plots.

**DE** informed us of District Council website has a new planning database to find documents re this project.

**DM** suggests that WAA will not see this until the last brick is laid – however if they are around the Curbridge then it may not alleviate our waiting list. Phil Shaw is the main planning person and **DE** suggested WAA write to him to ask what we can know re timescale/water troughs/compost toilets.

### What will the set aside money that has been saved from Madley site used for?

Possible fencing/ troughs and land (£300,000) **GB** said it was more than that (£450,000 in c.2000) and he thought it was given to-buy land for allotments.

**DM** said that we should be using the money to buy land but no one is releasing land for allotments.

#### DE asked - Where would you want to get land?

We need to get more land in Newland area really as that is where the demand is.

VF what about land near the A40 ?

**DE** said he had a long term vision of bits of extra development – some along side Manor Road (a field) and besides the new cemetery – plan to have an entrance off the main road. **DE** informed WAA that If they were to develop this area the land owner has implied they would maybe give some land for allotments.

#### DE informed us about Park Road allotment site.

It is not part of WAA as it was not land owned by WTC – however **DE** suggested that WAA may be offered that allotment site now. Rumours suggest that Cottsway are thinking of building houses there but **DE** said he has been assured this is not the case.

GB said if they want us to take it over then we would only do so on a peppercorn rent.

**DE** is going to ask Cottsway if they would be willing to hand it over the WAA

# DE - Can I ask about turnover of plots – what happens? Do you allow some to share with others in Witney?

**MK** Explained the system we currently use.

Do you operate a apprenteship system?

**GB** Reported on our raised bed project.

#### DE could some of the land that belongs to Council have a few raised beds?

WAA said it has to be fenced and safe if that was the case – there may be some areas of land that could accommodate this?

**DE** felt if it had to be fenced etc. he thought then it could not be used as general public use.

**DM** suggested community space which could be an annexe to a main plot.

**DE - Quail** – Oxford City does not allow any animals who are very stern about risks. **DE** said WTC will not determine which livestock can be kept on allotments and will forward responsibility to WAA.

**DM** would have preferred if the WTC had given us a more specific answer.

**DE** will visit allotment sites and see various plots.

Meeting finished: 9.15pm

**Next meeting:** Wednesday 4<sup>th</sup> November – Blue Boar 7.30pm
